

# E-MULTICABINET

THE COMPARTMENT CABINET WITH VARIABLE COMPARTMENTS

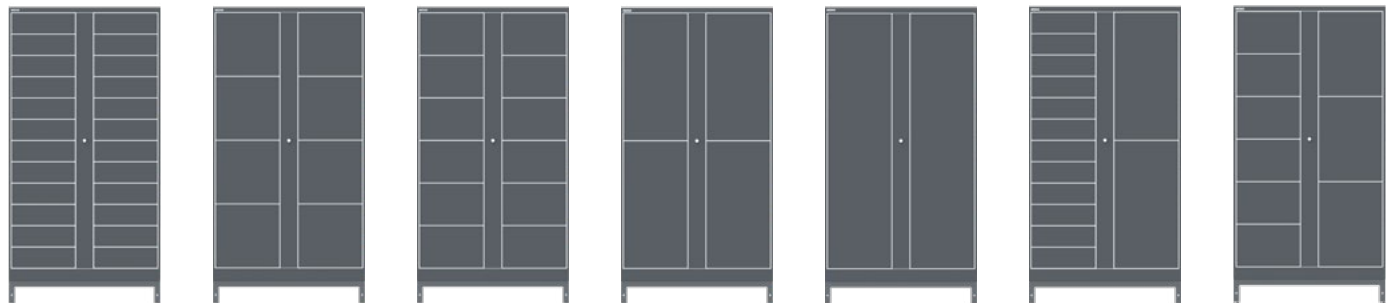

From power tools to smartphones, work clothes or e-bike batteries: operating equipment and personal items come in a wide variety of shapes and sizes. That's why the LISTA E-Multicabinet is available with variable compartments and a central service compartment – for secure storage at your workplace with electronic access control.

## THE E-MULTICABINET AT A GLANCE

- +** Optimum use of space
- +** Optimal price-performance relationship
- +** Can be integrated into existing control systems
- +** Power modules can be individually configured

## LARGE NUMBER OF VARIANTS

## THE E-MULTICABINET IN DETAIL

The LISTA E-Multicabinet can be flexibly adapted to your individual storage requirements. The quantity and formats of the compartments can be flexibly combined and equipped with a wide array of power modules. The cabinet has the same interface as all LISTA LEC systems and can be controlled both with the LISTA E-Control software as well as with proprietary software. The central service compartment allows for simple, manual emergency opening and maintenance. As a versatile solution, the E-Multicabinet enables you to make optimum use of the available space while offering reliable electronic access control for all valuable stored goods.
